Method of test at ambient temperature. BS EN SIO 6892-1 is the standard that brings together the European and international methods of testing metallic materials at ambient conditions. BS EN ISO 6892-1 is for designers and engineers of metallic products and components; specifiers and the insurance industry. It will also be a useful reference for major fabrication contracts between manufacturers and customers.

Whereas, ISO 6892-1:2016 standard specifies closed loop strain control, method A1, is strain rate control based on feedback of data obtained from instrument's extensometer. Application for this method is given by tolerances of required four step speed standard. Standard speed steps are schematically shown in Figure 4.

In 2009, ISO 6892-1 replaced and combined both the previous ISO 6892 and the widely used EN10002-1:2001 standards. It incorporated many changes, but most notably, it introduced the testing rates based on strain rate (Method A). Method A was the recommended approach and was based on maintaining a strain rate.
